

Introducing WeiTronic's convenient remote control

# Now you have greater remote control from the house to the garden

[www.weinor.co.uk](http://www.weinor.co.uk)

**weinor**  
THE AWNING  
*... more than  
sun protection*

# High-quality remote control as easy as child's play

### *It really works*

*Just lean back and control the shade, light and warmth using weinor's new remote control technology. With the products in our **WeiTronic** series, you'll discover a whole new world of easy-to-use remote controls.*

### **WeiTronic Remoto**

Elegantly shaped and practical, this device is capable of controlling both large and small awnings, individual awnings and several awning systems, and can dim and control light and heating systems.

### Features that speak for themselves

- Service-friendly: the motor can be detached from the radio receiver
- More safety due to the narrow-band transmission on a new frequency 868 MHz; no interference or jamming through neighbouring frequencies;
- Range of up to 100 m in open spaces;
- Factory default settings;
- Child's play to use;
- Smart design

The **WeiTronic Remoto** is available in four models each offering different applications:

- **WeiTronic Remoto 1** controls
  - 1 receiver or
  - 1 group of receiversyour awning, for example, or for dimming or brightening light or raising and lowering heat levels.
- **WeiTronic Remoto 1M**
  - activates and deactivates the **WeiTronic Lumero-868** or **WeiTronic Aero-868** automatic sun control on top of the features in **WeiTronic Remoto 1**.
- **WeiTronic Remoto 5** controls
  - 5 receivers or
  - 5 groups of receiversindividually or simultaneously. For example: 5 awnings or 5 groups of awnings
- **WeiTronic Remoto 5M**
  - activates and deactivates the **WeiTronic Lumero-868** or **WeiTronic Aero-868** automatic sun control on top of the features in **WeiTronic Remoto 5**.

# Not magic, but quite simply ultramodern remote control technology

Control your awnings using remote control technology ...

... your **Lux lightbar** patio lighting ...

... and also your **Tempura heating system**.

With weinor's new remote control technology, you don't need to move an inch. Quite simply, you have full control over the amount of shade, light or warmth using the remote control. The **WeiTronic Remoto** is easy and convenient to use: everything can be controlled at the press of a button.

### WeiTronic Combio

The receiver is the heart and soul of the **WeiTronic** system. Small but super intelligent, it fits snugly and out of sight into the fancy bar.

Whichever **WeiTronic radio receiver** you choose to control your awnings or the Tempura heating system, it can be mounted +outdoors and out-of-sight. You benefit in that you only need to replace the receiver and not the entire motor if the device needs servicing. At the same time, since the WeiTronic system is compatible with the Elero remote control system, it can be used for a broad range of applications.

*WeiTronic Combio-868 HD 1.5 KW in a fancy bar.*

### The WeiTronic Combio receiver is available in three models

- The **WeiTronic Combio-868 MA** receives the radio signal from the **WeiTronic Remoto** handheld transmitter and triggers the tube-mounted motor which retracts or extends your awning whenever desired.
- The **WeiTronic Combio-868 HD** controls and lowers the **Tempura heating system**.
- The **WeiTronic Combio-868 LD** controls and dims the **Lux lightbar**.

## Sun Sensor WeiTronic Lumero-868

The true sun sensor without wind control function can be activated and deactivated using the **WeiTronic Remoto 1M** or **WeiTronic Remoto 5M**. The solar cell means no electric power is required. Suitable for awnings that are not reliant on wind, such as the WGM Sottezza.

## Radio Receiver WeiTronic Combo-868 MA

Receiver for electrically operated awnings.

## Automatic Sun and Wind Control WeiTronic Aero-868 AC 230

Works with a 230-volt power cable and can be activated and deactivated using the **WeiTronic Remoto 1M** or **WeiTronic Remoto 5M** handheld remote control. Automatically retracts the awning in windy conditions and extends it in sunshine.

## Automatic Sun and Wind Control WeiTronic Aero-868 solar

"Obeys" the **WeiTronic Remoto 1M** and **WeiTronic Remoto 5M**. Automatically retracts the awning in windy conditions and extends it in sunshine. The solar cell means no electric power is required.

## Remote control socket WeiTronic Combo-868 ST

Remote control socket to switch on electrically powered appliances with a power consumption of up to 2000 W. For use in dry rooms only!
